SOLITAIRE

SCOREBOARD

HELP

PLAYER

History

Solitaire is an american expression used for **Patience** card games. They have often similar rules and mutual trait is that one doesn't need other people to play them as your only opponent is chance.

These card games became popular from 17th century France among nobles and political prisoners as a fun way to pass the time.

Fan of these games were for example **Napoleon** and **Marie Antoinnette**.

How to win

Klondike is the most known Solitaire game. The goal is to stack all cards of same suit in ascending order on one of four designated piles.

A game ends once all **52** cards (4 suits * 13 cards) are **stacked**, although it's important to keep in mind not every game is solvable and with every wrong decision the tree of solutions shrinks.

Rules

There are 5 actions that player can take.

- Move the top card of deck on side.
- When deck is empty, move all cards from side back on it in reverse order.
- Move 1 - 13 cards from a bottom pile to different bottom pile. This is possible under one of these conditions:
 - First card is a king and the pile that it's being move to is empty.
 - First card is different colour and it's value is 1 less than the card its being move onto. (e.g. **7♥** onto **6♠**)
- Move one card from a bottom pile onto the stacking pile. Both cards have to be of same suit and top one's value has to be one higher. (e.g. **K♥** onto **Q♥**)
- Move one card from side deck onto a bottom or stacking pile.

GAME

SOLITAIRE

This is truly amazing game I have to admit.

misel

MARK

PROJECT

WEB

Indeed I agree. If I were to mark it I think it deserves 100/100. Brilliant

This is a university project for course **CSD 2550**.
